

MONIKA'S NURSING ACADEMY HAMIRPUR

QUESTION PAPER HPSSSB - 2016

Total Marks : 200

Time : 2 hours

1. **The nurse is taking care of a patient after vaginal hysterectomy for prolapsed uterus. Which of the following nursing interventions by the nurse would bet minimize the risk of pulmonary embolism in this patient?**
 - (a) Positioning the patient at high Fowler's position
 - (b) Providing small pillow under the knees for comfort.
 - (c) Assessing lower extremities for warmth and swelling
 - (d) Early ambulation
2. **Axial skeleton consist of**
 - (a) 40 bones
 - (b) 80 bones
 - (c) 100 bones
 - (d) 126 bones
3. **Adequacy of fluid replacement in a patient with shock is best determined by**
 - (a) Systolic blood pressure above 100mm Hg
 - (b) Diastolic blood pressure above 100 mm Hg
 - (c) Urine output of 30 ml per hour
 - (d) Urine output of 50 ml per hour
4. **The most common symptom of a sliding hiatal hernia is**
 - (a) Feeling of fullness
 - (b) Difficulty in breathing
 - (c) Gastroesophageal reflux
 - (d) All of the above
5. **Which of the following symptom is suggestive of breast cancer?**
 - (a) Breast enlargement
 - (b) Breast tenderness
 - (c) Darkening of nipple
 - (d) Unilateral discharge from nipples
6. **Symptoms of Hypoglycaemia usually does not occur until the blood glucose level is less than**
 - (a) 60-70 mg/dl
 - (b) 50-60 mg /dl
 - (c) 40-50 mg/dl
 - (d) 30-40 mg/dl
7. **Quarantine is related to**
 - (a) Maximum incubation period
 - (b) Minimum incubation period
 - (c) Serial interval
 - (d) Generation time
8. **Persistent lack of appetite often ocuring with vomiting and severe weight loss is referred to as**
 - (a) Stuttering
 - (b) Anorexia Nervosa
 - (c) Bulimia Nervosa
 - (d) Pica
9. **A nurse observes a convulsions and twitching of extremities in a new born infant. What could be the probable cause for it.**
 - (a) Asphyxia
 - (b) Meningitis
 - (c) Cerebral haemorrhage
 - (d) Infection
10. **The most common method of reproduction of bacteria is**
 - (a) Binary fission
 - (b) Budding
 - (c) Sexual
 - (d) Spore formation
11. **The first indicator for PEM is**
 - (a) Underweight for age
 - (b) Underweight for height
 - (c) Underheight for age
 - (d) Underweight for economic status
12. **While assessing vital signs of a patient having recurrent attack of seizures the nurse should**
 - (a) Take an auxiliary temperature every 4 hourly
 - (b) Observe for bradycardia
 - (c) Observe for bradypnea
 - (d) All of the above
13. **A patient who keeps repeating a word over and over is demonstrating**
 - (a) Neologism
 - (b) Circumstantiality
 - (c) Stereotype
 - (d) Senility
14. **The nurse is assessing vital signs of a patient with head injury. Which of the following findings indicates increased intracranial pressure?**
 - (a) Tachycardia
 - (b) Bradypnea

MONIKA'S NURSING ACADEMY HAMIRPUR

- (c) Widened pulse pressure (d) Decreased body temperature
15. **A hormone that stimulate the flow of pancreatic enzyme is**
(a) Entrocrinin (b) Pancreozymin
(c) Enterogastrone (d) Cholecyskinin
16. **Objective measurement of patient's level of consciousness is best determined by using Glasgow scale is called**
(a) Consciousness Scale (b) Communication scale
(c) Coma Scale (d) Stimuli Scale
17. **When planning care for a person with burn on the upper part of the body involving face and neck. Which of the following nursing diagnosis should take the highest priority?**
(a) Fluid volume deficit (b) Body image disturbances
(c) Ineffective airway clearance (d) Risk of infection
18. **After lumbar laminectomy nurses should**
(a) Encourage the patient to cough
(b) Instruct the patient to bend knees when turning
(c) Assess the patient for indications of peritonitis
(d) Logroll the patient by using draw sheet
19. **Pulse pressure of B.P. 140/90 mm of Hg is**
(a) 50mm of Hg (b) 140mm of Hg
(c) 90mm of Hg (d) None of above
20. **A patient admitted in emergency ward with diagnosis of cardiac arrest. Cardio Pulmonary resuscitation is to be given. The nurse know that ratio of compression to ventilation to adult by one person is :**
(a) 5:1 (b) 15:2 (c) 1:5 (d) 10:2
21. **Time required to read mantoux test**
(a) 12-24 hours (b) 24-48 hours
(c) 48-72 hours (d) 72 hours
22. **Drugs that contract pupil of the eye is called**
(a) Meiotic (b) Mydriatics
(c) Lozenges (d) Demulcents
23. **Antidote of magnesium sulphate is**
(a) Calcium gluconate (b) Diazepam
(c) Calcium Chloride (d) Nelorphine hydrochloride
24. **Wilm's tumor is condition affecting**
(a) Kidney (b) Bone
(c) Liver (d) Brain
25. **Waiver's tip position is seen in**
(a) Bell's palsy (b) Facial palsy
(c) Erb's palsy (d) Congenital dislocation of hips
26. **For administering 3000 ml of fluid in 24 hours the flow rate is**
(a) 15 drops/minute (b) 31 drops /minute
(c) 45 drops/minute (d) 60 drops /minute
27. **Relationship of fetal head and limbs to its trunk is called**
(a) Lie (b) Presentation
(c) Attitude (d) Position
28. **Diagnostic of rabies**
(a) Gaurneri bodies (b) Negri bodies
(c) Cow dry A body (d) Cow dry B body
29. **Fothergill's operation is done for**
(a) Cervical tear (b) Cervical cancer
(c) Uterine infection (d) Uterine prolapsed
30. **Inhalation of cotton dust causes**
(a) Byssinosis (b) Bagassosis
(c) Nirthacosis (d) Mouldy lungs
31. **A woman with infertility receives an ovary transplantaion from her sister who is an identical twin, what type of graft it is?**
(a) Xenograft (b) Autograft
(c) Allograft (d) Isograft
32. **Most common complication of radio iodine therapy for thyrotoxicosis is**
(a) Hypthyroidism (b) Hypoparathyroidism

MONIKA'S NURSING ACADEMY HAMIRPUR

- (c) Late Developmental of malignancy
(d) Recurrence
33. **All of the following are the side effect of blood transfusion, except**
(a) Hypocalcaemia (b) Hypothermia
(c) Acidosis (d) Hypercalcaemia
34. **Cardio pulmonary bypass was first used in 1953 by**
(a) Gibbons (b) Sauttan
(c) Jefferson (d) Christian Bernard
35. **Cleft lip surgery is done at**
(a) Birth (b) 3-6 month
(c) 6-9 month (d) 9-12 month
36. **Quad is an individual who is**
(a) Impotent (b) Potent
(c) Impotent only for particular women
(d) Become potent after surgery
37. **Croup is**
(a) Laryngotracheal bronchitis (b) Trachea esophageal fistula
(c) Tracheal fistula (d) Esophagitis
38. **An inflammatory autoimmune disease that affect the connective tissue of the heart and joint is**
(a) Rheumatic fever (b) Rheumatoid arthritis
(c) Osteoarthritis (d) Osteochondritis
39. **Blood clot floating in the circulating blood**
(a) Emboli (b) Thrombus
(c) Plague (d) Aneurysm
40. **Agorphobia is a fear of**
(a) Open space (b) Height
(c) Closed Space (d) Animals
41. **Blisters are mainly seen in**
(a) Ist degree burn (b) 2nd degree burn
(c) 3rd degree burn (d) 4th degree burn
42. **With reference to Himachal Pradesh 'Siddu' is a**
(a) Traditional Costume (b) Rural Game of Kinnaur
(c) Traditional Dish (d) Marriage ritual
43. **Dr. Rajendra Prasad Medical College in Tanda is situated in which District of Himachal Pradesh?**
(a) Shimla (b) Mandi
(c) Solan (d) Kangra
44. **Mountain day in Himachal Pradesh is celebrated on**
(a) 15th April (b) 25th January
(c) 1st November (d) 24th January
45. **Which picture is published/printed in the State Calender -2016 released by the Govt. of Himachal Pradesh?**
(a) Flower of Pink Buransh (b) The green apple garden
(c) Chief Minister addressing to the meeting of women
(d) View of a school in the tribal area of Lahaul Spiti
46. **Famous Bhootnath Temple is situated in the district of**
(a) Chamba (b) Mandi
(c) Kullu (d) Sirmour
47. **The river flowing through the Himachal was popularly known as 'Parushani' during vedic period is**
(a) Ravi (b) Vyas (c) Satlej (d) Yamuna
48. **If you are passing through the Sangla Valley, you are touring the district of Himachal Pradesh.**
(a) Kullu (b) Chamba
(c) Shimla (d) Kinnaur
49. **The famous Bhuri Singh Museum is in the district of**
(a) Kangra (b) Shimla
(c) Sirmaur (d) Chamba
50. **Which one of the following river is related with Nathpa-Jhakri Hydro-Electric Project?**

MONIKA'S NURSING ACADEMY HAMIRPUR

- (a) Vyas (b) Chandrbhaga
(c) Yamuna (d) Satlej
51. Which district of Himachal Pradesh is famous for the Pin Valley National Park?
(a) Kullu (b) Kinnaur
(c) Lahaul-Spiti (d) Shimla
52. Which one of the following lake is in the district of Sirmour?
(a) Renuka (b) Parashar
(c) Kamrunag (d) Ghadasaru
53. In the year 1809 there was a treaty of Held between the Maharaja Ranjeet Singh and Sansar Chand.
(a) Bhangani (b) Nadaun
(c) Nurpur (d) Jwalamukhi
54. In which of the following places Sun Temple is located?
(a) Tatta Pani (b) Vashishtha
(c) Neerath (d) Karsog
55. The book 'Himalan Polyandry' is written by whom?
(a) Miyan Goverdhan Singh (b) Shanta Kumar
(c) D.N. Mazumdar (d) A.F.P. Harcourt
56. Which one is the famous fair of Rampur?
(a) Ladaracha (b) Nalvadi
(c) Shivaratri (d) Lavi
57. The number of Himachal Pradesh Legislative Assembly Members is
(a) 4 (b) 52 (c) 68 (d) 72
58. In the ancient time Nagarkot was the capital of which of the following Riyasat?
(a) Kunihar (b) Nalagarh (Handur)
(c) Trigart (d) Guler
59. The famous industrial city Mehatpur is in which district of Himachal Pradesh?
(a) Sirmour (b) Kangra (c) Bilaspur (d) Una
60. The highest mountain peak of Himachal Pradesh is named as
(a) Kailash (b) Shila
(c) Leo-Pargil (d) Chuddhar
61. Mohan Meakin Brewery is in the district of
(a) Solan (b) Shimla (c) Una (d) Sirmaur
62. Mahabharata was written by
(a) Tulsidas (b) Ved Vyas
(c) Valmiki (d) Vashistha
63. In which year, the Jallianwala Bagh Massacre took place?
(a) 1915 (b) 1919 (c) 1921 (d) 1942

(a) 6 (b) 7 (c) 8 (d) 9

MONIKA'S NURSING ACADEMY HAMIRPUR

71. To which of the following categories of Rights, does the right to property belong?
(a) Legal Right (b) Fundamental Right
(c) Human Right (d) Natural Right
72. Who is vested with the emergency powers related to the declaration of National Emergency or Financial Emergency?
(a) Prime Minister (b) Defence Minister
(c) Home Minister (d) President
73. Blood is a
(a) Acidic Solution (b) Basic Solution
(c) Buffer Solution (d) Neutral Solution
74. Which of the following hormones contain iodine?
(a) Thyroxine (b) Testosterone
(c) Insulin (d) Adrenaline
75. The major component of honey is
(a) Glucose (b) Sucrose
(c) Maltose (d) Fructose
76. The major chemical compound found in human kidney stones is
(a) Urea (b) Calcium Carbonate
(c) Calcium Oxalate (d) Calcium Sulphate
77. In the human body, which structure is the appendix attached to
(a) The large intestine (b) The small intestine
(c) The gall bladder (d) The stomach
78. Sound waves cannot pass through
(a) A solid liquid mixture (b) An ideal gas
(c) A liquid gas mixture (d) A perfect vacuum
79. Light year is related to
(a) Energy (b) Speed
(c) Distance (d) Intensity
80. The mirror used in automobiles to see the rear field of view is
(a) Concave (b) Convex
(c) Plain (d) None of these
81. Which state is associated with the river 'Sabarmati'?
(a) Odisha (b) Karnataka
(c) Jharkhand (d) Gujarat
82. The tribe 'Shompens' is found in
(a) Tripura (b) Meghalaya
(c) Andaman & Nicobar Islands (d) Nagaland
83. The Hailey's comet reappears after every years.
(a) 56 (b) 66 (c) 76 (d) 96
84. 'Panchgani' is a famous hill station in
(a) Madhya Pradesh (b) Maharashtra
(c) Uttarakhand (d) Kerala
85. The name 'Ustad Zaki Hussain' is associated with
(a) Sitar (b) Shehnai (c) Table (d) Sarod
86. As per Census-2011, the lowest literacy rate is in
(a) Bihar (b) Madhya Pradesh
(c) Rajasthan (d) Uttar Pradesh
87. Where is the head office of RBI located?
(a) Mumbai (b) Delhi
(c) Kolkata (d) Bangaluru
88. Golden Lotus Award (Swarna Kamal) is associated with
(a) Social Work (b) Industry
(c) Literature (d) Films
89. 'Bull fighting' is the National Game of
(a) Italy (b) Bhutan
(c) Spain (d) China
90. 'Irani Trophy' is associated with
(a) Cricket (b) Hockey
(c) Football (d) Lawn Tennis
91. There are member-nations of UNO

MONIKA'S NURSING ACADEMY HAMIRPUR

- (a) 191 (b) 193 (c) 196 (d) 198
92. **Choose the Odd-one out**
 (a) Marigold (b) Lily (c) Lotus (d) Flower
93. **Complete the series**
 Z9Y, Z7W, V5U, T3S.....?
 (a) R2Q (b) P1Q (c) Q2R (d) R1Q
94. **Give the antonym of 'Virtue'**
 (a) Ugly (b) Dull (c) Vice (d) Weak
95. **We should be respectful..... our elders.**
 (a) for (b) to (c) on (d) by
96. **The study of population**
 (a) Polity (b) Genealogy
 (c) Demography (d) Ethnology
97. **What do you understand by the phrase 'Bolt from the blue'?**
 (a) Something unexpected (b) Spiritual mind set
 (c) Coward Person (d) A blind man

102. **Nurse is assessing a patient admitted with bacterial meningitis. She is expected to find all of the following signs except.**
 (a) Trismus (b) Nuchal rigidity
 (c) Kerning's Signs (d) Brudzinski's Sign
103. **The pain medication of choice in acute Myocardial infraction is**
 (a) Pethidine hydrochloride (b) Diclophenac sodium
 (c) Codeine sulphate (d) Morphine sulphate
104. **The nurse is taking care of a patient at high risk of aspiration Pneumonia, which of the following nursing intervention will help to prevent aspiration pneumonia?**
 (a) Performing mouth care with the patient in supine position
 (b) Elevating the head of the patient in at least 45 degree angle after entering feeding.
 (c) Providing pulmonary toilet after feeding the patient
 (d) Both (b) and (c)
105. **A positive reaction to Mantux test indicates that:**
 (a) The individual has active tuberculosis
 (b) The individual has developed immunity to tuberculosis
 (c) The individual has been exposed to tuberculosis
 (d) The individual will develop active tuberculosis in near future.
106. **The nurse is teaching a group of diabetic patients regarding prevention of foot ulcer. Which of the following she should emphasize in her teaching?**
 (a) Wash and inspect all surfaces of the feet daily
 (b) Cut the toenail by rounding edges
 (c) Treat small cuts promptly by disinfection with iodine
 (d) use hot water bottles to warm feet in winter to improve circulation
107. **Humoral immunity is transferred through**

MONIKA'S NURSING ACADEMY HAMIRPUR

- (a) T cells (b) B cells
(c) Alpha cells (d) Beta cells
108. Which of the following is not a component of bishop's score?
(a) Cervical consistency (b) Cervical dilatation
(c) Position of Head (d) Station of Head
109. Inherited sex linked bleeding disorder is
(a) Haemophilia (b) Thalassemia
(c) Sickle cell disease (d) Purport
110. Skin graft that is taken from another portion of the patient's own body is known
(a) Allograft (b) Kenograft
(c) Autograft (d) Domograft
111. SLE is a disease of
(a) Bones (b) Erythrocytes
(c) Connective tissue (d) Joints
112. Psychosexual disorder in which sexual behaviour is directed to animal
(a) Fetishism (b) Bestiality
(c) Frotteurism (d) Transvestism
113. The second heart sound is due to
(a) Aortic valve (b) Mitral valve
(c) Tricuspid valve (d) Foremen ovale
114. A 48 years old woman presents to the hospital complaining of chest pain tachycardia and dyspnea. On exam, heart sounds are muffled. Which of the following assessment findings would support a diagnosis of cardiac tamponade?
(a) A deviated trachea
(b) Absent breath sounds to the lower lobes
(c) Pulse 40 with inspiration
(d) Blood pressure 140/80
115. An important condition causing renal calculi
(a) Nephrotic Syndrome (b) Renal Tumours
(c) Hypderparathrodism (d) Hypertension
116. Digoxin is not given when heart is
(a) Below 60/minute (b) Below 70/minute
(c) Below 80/minute (d) Below 90/minute
117. In following which is the side effect of streptomycin
(a) Damage to 8th cranial nerve
(b) Damage to growing cartilage
(c) Bone marrow depression
(d) Diarrhoea
118. Name the disease caused by human papilloma virus
(a) Herpes simplex (b) Warts
(c) Herpes Zoster (d) Psoriasis
119. The cause of ascites in cirrhosis of liver is
(a) Kidney malfunction (b) General fluid imbalance
(c) Portal obstruction (d) Vitamin Deficiency
120. Which of the following hormone is modified amino acid?
(a) Epinephrine (b) Progesterone
(c) Prostaglandin (d) Oestrogen
121. New-born skeleton is made up of
(a) 201 bones (b) 206 bones
(c) 208 bones (d) 300 bones
122. Each beat of human heart is completed in
(a) 85 second (b) 8.5 second
(c) 0.85 second (d) 5.8 second
123. Which of the following condition caused by elevated intra-ocular pressure?
(a) Glaucoma (b) Cataract
(c) Strabismus (d) Myopia
124. Movable bone in the skull is
(a) Maxilla (b) Mandible
(c) Nasal Bone (d) None of these
125. Most common complication of mumps in children is

MONIKA'S NURSING ACADEMY HAMIRPUR

- (a) Peritonitis (b) Meningitis
(c) Orchitis (d) Pancreatitis
126. **The vaccine administered as an intranasal spray**
(a) Rubella (b) Poliomyelitis
(c) Measles (d) Influenza
127. **Which system of the body gets infected in Rabies?**
(a) Cardiovascular (b) Central nervous system
(c) Respiratory system (d) G.I. system
128. **Persistence of Moro's reflex is abnormal beyond the age of**
(a) 3rd month (b) 4th month
(c) 5th month (d) 6th month
129. **Population covered by anganwadi workers in rural area is**
(a) 1000 (b) 700
(c) 400 (d) 500
130. **Sunset eye is typical disease**
(a) Encephalitis (b) Hydrocephalus
(c) Congenital Heart disease (d) Meningitis
131. **A child with Tetralogy of Fallott position uses which of the following?**
(a) Supine Position (b) Prone Position
(c) Squatting Position (d) Leaning forward Position
132. **What is complication of osteoporosis?**
(a) Infection (b) Compartment syndrome
(c) Fracture (d) Contracture
133. **Most common site of metastasis in breast cancer is**
(a) Lung (b) Liver (c) Bone (d) Brain
134. **Normal intraocular pressure is**
(a) less than 20mm/Hg (b) More than 20 mm/Hg
(c) Less than 25mm/Hg (d) More than 25mm/Hg
135. **During pregnancy, deficiency of which of the following leads to neural tube defect?**
(a) Folic acid (b) Iron (c) Calcium (d) Zinc
136. **The most accurate way to determine the need for oxygen in patient with CPD is**
(a) Observing skin colour (b) Is changing vital sign
(c) Asking how the patient feels (d) Blood gas analysis
137. **Bile salts are produced from**
(a) Cholestrol (b) Amino acid
(c) Glycogen (d) None of the above
138. **Asymmetry of Gluteal folds of skin**
(a) Hip displacement (b) Hip Fracture
(c) Femur fracture (d) Osteomyelitis
139. **A Autism is diagnosed at**
(a) Infancy (b) 3rd year
(c) 5th year (d) school age
140. **In patients with renal failure diets should be**
(a) Low protein, low sodium, low potassium
(b) Low protein, high potassium
(c) High carbohydrate, low protein
(d) High calcium, high protein
141. **Glasgow Coma scale has all, except**
(a) Verbal response (b) Motor response
(c) Sensor impairment (d) Eye opening
142. **Following is not the feature of haemorrhagic shock**
(a) Hypotension (b) Brady-Cardia
(c) Rapid and thready pulse (d) Thirst sensation
143. **The normal duration of spermatogenesis**
(a) 64 days (b) 74 days
(c) 30 days (d) 100 days
144. **Which finding is persistent with pernicious Anaemia?**
(a) Strawberry Tongue (b) Rice Water stool
(c) Beefy Red Tongue (d) Hypochronic R.B.C.
145. **Heat regulation centre is located at**

MONIKA'S NURSING ACADEMY HAMIRPUR

- (a) Thalamus (b) Hypothalamus
(c) Medulla oblongata (d) Cerebrum
146. **Complex developmental brain disorder with severity of intellectual and behaviour defects is**
(a) Psychosis (b) Hysteria
(c) Mania (d) Autism
147. **The snow storm appearance of uterus in USG indicates the presence of**
(a) Ectopic pregnancy (b) Fibroid in pregnancy
(c) Hydramnois (d) Vesicular mole
148. **Uterus becomes pelvic organ after delivery**
(a) 10-12 days (b) 12-14 days
(c) 16-18 days (d) 18-20 days
149. **The diameter of cervical canal after the complete dilation is**
(a) 6 cm (b) 8 cm
(c) 10 cm (d) 12 cm
150. **Infection of soft tissue around and under the skin**
(a) Felon (b) Carbuncle
(c) Cellulitis (d) Paronychia
151. **Deficient salivation is called**
(a) Xerophthalmia (b) Xerostomia
(c) Ptyalism (d) Halitosis
152. **Which of the following symptoms is most characteristic of a patient with cancer of the lung?**
(a) Air hunger (b) Exertional dyspnea
(c) Cough with night sweats (d) Persistent changing cough
153. **Mr. Shyam has just returned from the post anaesthesia care unit (PACU) from a haemorrhoidectomy. His postoperative orders included sitz-bath every morning. The nurse understands that sitz-bath is use for :**
(a) Promote healing (b) Relieve tension
(c) Lower body temperature (d) Cause swelling
154. **A 36 year old female complains of headache and neck pain. The nurse assessments reveal painful flexion of the neck to the chest. The nurse understands that muchal rigidity is associated with.**
(a) Brain tumour (b) CVA
(c) Meningitis (d) Subdural hematoma
155. **A 40 year old male patient is complaining of chronic progressive and mentioned deterioration is admitted to the unit. The nurse recognizes that the characteristics indicate a disease that results in degeneration of the base ganglia and cerebral cortex. The disease is called:**
(a) Multiple sclerosis (b) Myasthenia gravis
(c) Huntington's disease (d) Gullian-Barre syndrome
156. **Mr. Sunil has Parkinson's disease and he finds the resting tremor. He is experiencing in his right hand very frustrating. The nurse advises him to:**
(a) Take a warm bath (b) Hold and object
(c) Practice deep breathing (d) Take diazepam as needed
157. **A shuffling gait is typically associated with the patient who has:**
(a) Parkinson's disease (b) Multiple sclerosis
(c) Reynaud's disease (d) Myasthenia gravis
158. **A 47 year old man with liver failure who has developed ascitis. The nurse understands that ascitis is due to**
(a) Dehydration (b) Protein deficiency
(c) Bleeding disorders (d) Vitamin deficiency
159. **A patient with rheumatoid arthritis may reveal which of the following assessment data?**
(a) Heberdens nodes
(b) Morning stiffness no longer than 30 minutes
(c) Asymmetric joint swelling
(d) Swan-neck deformities
160. **Mr. Ram Nath, a 63 year old, went to the clinic complaining of hoarseness of voice and cough. His wife states that his voice has changed in the last few months. The nurse interprets that Mr. Ram Nath's symptoms are consistent with which of the following disorders.**
(a) Chronic sinusitis (b) Laryngeal cancer

MONIKA'S NURSING ACADEMY HAMIRPUR

- (c) Gastroesophageal reflux disease
(d) Coronary artery disease
161. Mrs. Singh is a 58 year old woman who is being admitted to the medical ward with trigeminal neuralgia. The nurse anticipates that Mrs. Singh will demonstrate which of the following major complaints?
(a) Excruciating, intermittent, paroxysmal facial pain
(b) Unilateral facial droop
(c) Painless eye spasm
(d) Mildly painful unilateral eye twitching
162. A 38 year old woman returns from subtotal thyroidectomy for the treatment of hyperthyroidism. Upon assessment, the immediate priority that the nurse would include is:
(a) Assess for pain (b) Assess for neurological status
(c) Assess fluid volume status (d) Assess for respiratory distress
163. Tetany can be produced by which of the following electrolyte disturbance?
(a) Hypocalcaemia (b) Hypermagnesia
(c) Hypercalcaemia (d) Hypomagnesia
164. Anterior fontanel normally closes between ages:
(a) 2 & 3 months (b) 12 & 18 months
(c) 3 & 6 months (d) 1 & 9 months
165. Commonest cause of neonatal death in India is :
(a) Prematurity (b) Congenital malformation
(c) Metabolic disease (d) Birth injury
166. Baby of diabetic mother show all, except:
(a) Hyaline membrane disease (b) Large baby
(c) Macrosomia (d) Hyperglycaemia
167. Foetal hypoxia is assessed by
(a) Scalp blood sampling (b) Alpha feto protein
(c) Fetal heart monitoring (d) Both (a) and (c)
168. Most common cause of jaundice in new born within the 1st 24 hours of life is
(a) Septicaemia (b) Biliary atresia
(c) Physiological (d) Erythroblastosis fetalis
169. A child is born to a woman who has tested HB_sAg positive. Should the infant receive the first dose of hepatitis B vaccine?
(a) Within 12 hours of birth (b) Within 1st 2 months after birth
(c) Between ages of 1 & 4 months (d) Between 6 & 18 months
170. Which of the following activities is most appropriate for 8 years old with an iron deficiency anaemia?
(a) Dancing (b) Playing video games
(c) Reading books (d) Riding cycle
171. Which of the following instructions is most important when teaching home management of a child with haemophilia?
(a) Toothbrushes should be held under warm water before use
(b) Aspirin should be used for mild joint pain & inflammation

(a) Protrusion of abdominal contents into scrotum
(b) Narrowing of the preputial opening of the foreskin
(c) Failure of one or both testes to descent into scrotum
(d) Fluid in the scrotum
174. Which sign of meningeal irritation occurs in a child diagnosed with bacterial meningitis?
(a) Marked irritability (b) Over riding sutures
(c) Prominent scalp veins (d) Depressed anterior fontanel
175. Which sign or symptoms would you expect to find in an infant with pyloric stenosis?

MONIKA'S NURSING ACADEMY HAMIRPUR

- (a) Vomiting of bile (b) Lethargy
(c) Diarrhoea (d) Projectile vomiting
176. **The nurse is assessing the lung with asthma. Which should the nurse most likely to hear?**
(a) Vascular sound (b) Wheezing
(c) Crackles (d) Pleural friction rub
177. **Which intervention by the nurse is most appropriate before digoxin administration?**
(a) Take the infant's blood pressure
(b) Check the infant's respiratory rate for 1 minute
(c) Check the infant's radial pulse for 1 minute
(d) Check the infant's apical pulse for 1 minute
178. **During assessment of a child visual acuity, which finding indicates that the child has myopia?**
(a) The child squints (b) The child closes one eye to see
(c) The child has rapid eyeball movements
(d) The child holds a book close to his face
179. **Standard schedule for antenatal checkup are all, except:**
(a) Every 4 weeks till 28th week (b) Every 2 weeks till 36th week
(c) Every week till 40th week (d) Every week till 12th week
180. **A pregnant woman diagnosis severe anaemia (Hb<7 gm/dl) will be treated by**
(a) Advise to take food rich in iron and vitamin C
(b) Advise to take iron and folic acid tablet IOD for 1 month
(c) Packed cell transfusion
(d) Administer iron I/M Injection IOD for 1 month
181. **The nurse working in labour room understands that preterm pre labour rupture of membrane (PPROM) can lead to the following:**
(a) Cord compression (b) Cord Prolapse
(c) Maternal wound infection (d) All of the above
182. **Common causes of vesico-vaginal fistula**
(a) Trauma to instrumental delivery
(b) Ischemia and Pressure necrosis of anterior vaginal wall and posterior bladder wall.
(c) Caesarean section (d) All of the above
183. **After fistula repair, the nurse must advise the patient on discharge that:**
(a) Abstinence for 3 months
(b) Ensure that next delivery is by caesarean section
(c) Do pelvic floor exercises to strengthen the muscle
(d) Both (a) and (b)
184. **Rh Immuno Prophylaxis in Rh-ve mother is given if abortion occur in**
(a) More than 12 weeks of pregnancy
(b) Less than 12 weeks of pregnancy
(c) Ectopic pregnancy
(d) All of the above
185. **What is trimester wise weight gain in pregnancy?**
(a) 1, 5, 2 kg (b) 5, 2, 5 kg
(c) 1, 5, 5 kg (d) 5,5,5 kg
186. **What is crowning?**
(a) When the head touches the pelvic brim
(b) When the maximum diameter crosses the ischial spine
(c) Maximum diameter, stretches vulval outlet without recession of head even after contraction
(d) All are correct
187. **Extended arms in breach presentation can be successfully delivered by:**
(a) Mayurcielau-smellie-veit manoeuvre
(b) Love set Manoeuvre
(c) Burns Marshal Method
(d) None of the above
188. **Presumptive signs and symptoms are all, except:**
(a) Morning sickness (b) Quickening
(c) Breast changes (d) Hegar's sign
189. **Increased pulsation felt in the lateral vaginal fornices due to marked vascularity is**

MONIKA'S NURSING ACADEMY HAMIRPUR

- (a) Oslander's sign (b) Softening of the cervix
(c) Hegar's sign (d) Jacquemier signs
190. **Amniocentesis is done to detect all foetal abnormalities, except:**
(a) Down syndrome (b) Open neural tube defect
(c) Lecithin sphingomyelin ratio (d) mental retardation
191. **Measurement from lower border of the symphysis pubis to the centre of the promontory of the sacrum to know the pelvic capacity is known as**
(a) Diagonal conjugate (b) Obstetrical conjugate
(c) Transverse diameter of the brim
(d) Transverse diameter of the pelvic outlet
192. **When lower pole of the uterus is grasped with right hand and facing the woman's head is known as**
(a) Pelvic palpation (b) Combined grip
(c) Paw licks Manoeuvre (d) None of the above
193. **Value of hearing the foetal heart is all to know about the followings, except:**
(a) Positive signs of pregnancy (b) Proof that foetus is alive
(c) help in diagnosis is presentation and position
(d) Placenta previa
194. **When foetus dies and is retained in uterus is called**
(a) Missed abortion (b) Threatened abortion
(c) Inevitable abortion (d) Complete abortion
195. **Dangers of Molar pregnancy are all of the following, except:**
(a) Haemorrhage (b) Choriocarcinoma
(c) Sepsis (d) Habitual abortion
196. **Acute condition characterized by convulsion and oedema is:**
(a) Eclampsia (b) Epilepsy
(c) Pre-Eclampsia (d) None of the above
197. **The highest risk of parent to child HIV transmission is**
(a) During Pregnancy (b) During Birth
(c) During breast feeding (d) Shortly after birth
198. **In the neonatal period zidovudine syrup 2 mg/kg orally four times a day given for a period of :**
(a) 6 days (b) 3 weeks
(c) 6 weeks (d) 8 weeks
199. **Single dose of Nevirapine 2 mg/kg body weight must be given to new born of HIV positive mother within**
(a) 6 hours of birth (b) 12 hours of birth
(c) 24 hours of birth (d) 72 hours of birth
200. **Which of the nurse's action is not recommended while caring for the new born of HIV+ve mother?**
(a) Wiping of secretion from nose and eyes separately
(b) Wiping of secretion from mouth
(c) Use of mouth operated suction to extract mucus
