"Innovation is our Tradition"

Post Basic BSC Entrance-2021

1. **Collapsing pulse is also known as :-**

- A. Paradoxical pulse
- B. Water-hammer pulse
- C. Pulse-alternans
- D. Bigeminal pulse

2. **The enema given to relieve gaseous distension is :-**

- A. Cold enema
- B. Anthelminthic enema
- C. Carminative enema
- D. Purgative enema

3. **Which is not seen in hyperventilation :-**

- A. Seizures
- B. Alkalosis
- C. Hypocalcaemia
- D. Hyperphosphatemia

4. **"The goal of nursing is to put the patient in the best condition for nature to act upon him." This was stated by :-**

- A. Henderson
- B. Jean Watson
- C. Marta Rogers
- D. Florence Nightingale

5. **Physical signs indicative of poor nutrition are all, except :-**

- A. Dental caries, mottled appearance (fluorosis), malpositioning of teeth
- B. Brittle, depigmented, easily plucked, thin and sparse hair
- C. Deep red coloured tongue in appearance; surface papillae present
- D. Spoon-shaped, ridged, brittle nails

6. **Which of the following assessment finding is typical of extracellular fluid loss ?**

- A. Distended jugular veins
- B. Elevated hematocrit level
- C. Rapid thread pulse
- D. Increased serum sodium level

7. **Which of the following nursing intervention is appropriate when an IV infusion infiltrates ?**

- A. Elevate the site

B. Discontinue the infusion

C. Attempt to flush the tube

D. Apply warm, moist compress

8. **Treatment of hypothermia by active core warming is done by all except :-**

- A. Airway rewarming
- B. Insulation with warm blankets
- C. Warmed intravenous fluid infusion
- D. Extracorporeal blood warming

9. **The position ideal for Ryle's tube insertion is :-**

- A. Supine position
- B. Left lateral position
- C. High Fowler's position
- D. Neck extended position

10. **When planning care for a client who is HIV positive, what should the nurse do ?**

- A. Teach persons coming in contact with the client to wear a gown and mask at all times
- B. Teach persons to wear gloves when handling any of the client's body fluids
- C. Restrict visitors to immediate family
- D. Encourage the client to stay away from other persons as much as possible

11. **Which is the accurate way to check the position of Ryle's tube ?**

- A. Radiography
- B. Aspiration
- C. Bowl method
- D. Air bolus injection

12. **Accumulation of hardened feces in the rectum is known as :-**

- A. Faecolith
- B. Faecal impaction
- C. Constipations
- D. Fistula

13. **Intradermal injection is given as :-**

- A. 15 degree angle
- B. 30 degree angle
- C. 45 degree angle
- D. 90 degree angle

14. **An amputation bed is also known as :-**

- A. Fracture bed

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- B. Open bed
C. Stump bed
D. Cardiac bed
- 15. Which of the following is best treatment for an allergy?**
A. Live in a room free of dust
B. Use an electrostatics filter
C. Prevent the person from coming in contact with the sensitizing allergies
D. Use anti-histamines
- 16. The interpretation of the data collected about the patient represents the :-**
A. Assessment of the patient
B. Health problems of the patient
C. Proposal plan of care for the patient
D. Nursing interventions done for the patient
- 17. While lifting a patient, a nurse bends on her :-**
A. Hips and back
B. Hips and knees
C. Back and knees
D. Only back
- 18. A one year old child is admitted to the hospital with sickle cell anemia in crisis. Upon admission, which therapy will assume priority?**
A. Fluid administration
B. Exchange transfusion
C. Anticoagulant
D. Intramuscular administration of iron and folic acid
- 19. What should be included in foot care the client who has a peripheral disorder ?**
A. Avoiding exposure of the legs and feet to the sun
B. Walking barefoot only on carpeted floors
C. Applying lotion between the toes to avoid cracking of the skin
D. Soaking the feet for 20 minutes before washing them
- 20. What is the most recommended position for a client with severe ascites?**
A. Side lying
B. Dorsal
C. Sims
D. Fowler's
- 21. Which of the following is a diuretic?**
A. Captopril
B. Diltiazem
C. Furosemide
D. All of the above
- 22. Normal PR interval is :-**
A. 0.07 to 0.12 seconds
B. 0.12 to 0.20 seconds
C. 0.20 to 0.25 seconds
D. 0.25 to 0.30 seconds
- 23. Immediately after identification of arrhythmic ECG changes, the nurse should :-**
A. Treat arrhythmia
B. Inform patient and relatives
C. Correlate ECG changes with physical signs and symptoms
D. Call all other staff for help
- 24. First degree atrioventricular block occurs due to slowing of conduction through :-**
A. SA node
B. AV node
C. Bundle of HIS
D. Purkinje fibers
- 25. Digitalis toxicity is more common if serum electrolyte level shows :-**
A. Low sodium levels
B. High sodium levels
C. High calcium levels
D. Low potassium levels
- 26. 0.45% saline is :-**
A. Isotonic solution
B. Hypotonic solution
C. Hypertonic solution
D. Semi isotonic solution
- 27. Pain at Mc Burney point is a feature of :-**

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- A. Jaundice
B. Intestinal obstruction
C. Appendicitis
D. gastritis
- 28. Which of the following is the most common problem of hemorrhoids ?**
A. Flatulence
B. Rectal Bleeding
C. Hematemesis
D. Pruritis
- 29. Which of the following is a serious complications of portal hypertension ?**
A. Intestinal obstruction
B. Perforation of the duodenum
C. Haemorrhage from esophageal varices
D. Liver abscess
- 30. Which position should be given to a client with multiple injuries of face and neck ?**
A. Supine position
B. Semiprone position
C. Fowler's position
D. Knee-chest position
- 31. Psoriasis is an inflammatory disorder of :-**
A. Eye
B. Ear
C. Skin
D. Nose
- 32. Patient with fluid volume deficit with all except :-**
A. Dry mucus membrane
B. Decrease urine output
C. Weight loss
D. Dilution of urine
- 33. A patient with inadequate oxygenation will present with all expect :-**
A. Tachypnea and dyspnea on exertion
B. Tachycardia and Tachypnea
C. Restlessness and irritability
D. Irritability and mild hypertension
- 34. Reflex control of respiration occurs in:-**
A. Medulla and pros
B. Cerebral cortex
C. Hypothalamus
D. Cerebellum
- 35. What is the first thing a nurse should assess to determine the neurological states of patient ?**
A. Vital sign
B. Mental status
C. Reflexes
D. Level of consciousness
- 36. Which of the following is termed as Cooley's anemia ?**
A. Alpha thalassemia
B. Beta thalassemia
C. Gamma thalassemia
D. Theta thalassemia
- 37. Universal Standard Precaution are used :-**
A. For all patients
B. For all patients, unless they are under Transmission-Based Precautions
C. For all patients except those in protection isolation
D. For any patient the nurse believes might be infections
- 38. Which of the following is considered as an indication for admitting serum albumin ?**
A. Clotting of blood
B. Deficiency of WBCs
C. Deficiency of RBCs
D. Maintenance of oncotic pressure
- 39. Diabetes affects which part of the eye first?**
A. Retina
B. Cornea
C. Lens
D. Iris
- 40. Which of the following intervention id NOT recommended in watery diarrhea?**
A. Intravenous Albumin
B. Psyllium
C. Potassium supplement
D. Normal saline

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- 41. The suggested cause of abnormal behavior from the cognitive perspective is :-**
- A. Faulty learning
 - B. Early childhood experiences
 - C. Unconscious unresolved conflicts
 - D. Faulty thinking
- 42. The concept of introversion and extroversion was advanced by :-**
- A. Spranger
 - B. Jung
 - C. Kretschmer
 - D. Jansch
- 43. Client-centered therapy is most consistent with the :-**
- A. Behavioral approach
 - B. Cognitive approach
 - C. Psychodynamic approach
 - D. Humanistic approach
- 44. Psychoneurosis tends to be :-**
- A. Severe than the psychoses
 - B. Milder than neuroses
 - C. Milder than psychoses
 - D. About the same severity as the psychoses
- 45. Which symptom is not typically characteristic of an autistic child ?**
- A. Impairment in communication
 - B. Hyperactivity
 - C. Restricted range of interest
 - D. Social isolation
- 46. An affective disorder in which a person swings from one mood extreme to another classified as :-**
- A. Manic
 - B. Depressive
 - C. Unipolar
 - D. Bipolar
- 47. Which of the following represents the acronym for EEG?**
- A. Electroencephalogram
 - B. Electric energy graph
 - C. Encephalitic emotion graphing
 - D. Ego energy galvoscope
- 48. Which of the following is not an antidepressant drug ?**
- A. Tricyclic antidepressants
 - B. Monoamine oxidase inhibitors (MAOIs)
 - C. Selective serotonin reuptake inhibitors (SSRIs)
 - D. Phenothiazines
- 49. Behavior analysis is based upon the principles of :-**
- A. Classical conditioning
 - B. Operant conditioning
 - C. Dram analysis
 - D. All of these
- 50. Which of the following physical symptoms are associated with Panic attack :-**
- A. Palpitations
 - B. Perspiration
 - C. Hyperventilation
 - D. All of the above
- 51. Sleep walking is referred as :-**
- A. Hypersomnia
 - B. Amnesia
 - C. Somnambulism
 - D. Insomnia
- 52. The type of convulsion produced in ECT is the :-**
- A. Jacksonian type
 - B. Grand mal type
 - C. Focal type
 - D. All of the above
- 53. Paroxysmal cerebral dysfunction is seen in which of the following condition :-**
- A. Epilepsy
 - B. Depression
 - C. Panic disorders
 - D. None of the above
- 54. Flight of idea is seen in :-**
- A. Mania
 - B. Drug addiction
 - C. Mental retardation
 - D. Obsessive compulsive disorder
- 55. CAGE assessment is associated with :-**

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- A. Opioids
B. Alcoholism
C. Nicotine
D. Codeine
56. **Most severe withdrawal symptom of alcoholism is :-**
A. Sleeplessness
B. Delirium tremens
C. Rum fits
D. Cirrhosis of liver
57. **Worthlessness, hopelessness, helplessness and self-harming thoughts are the characteristic features of :-**
A. Schizophrenia
B. Depression
C. Anxiety
D. Mania
58. **Common side effects associated with anti-depressants is :-**
A. Impotence
B. Tremors
C. Mydriasis
D. All of above
59. **Altered maturation pattern of adolescent includes all of the following except :-**
A. Bulimia
B. Anorexia nervosa
C. Enuresis
D. Identity confusion
60. **An individual who is identified as having a borderline personality disorder shows :-**
A. Persecutory thoughts
B. Exhibitionistic tendencies
C. Instability in mood and social relations
D. Apathy and indifference to opinion of others
61. **A preschool child is in emergency department after ingestion of kerosene oil, the nurse would be alerted for which of the following?**
A. Uremia
B. Hepatitis
- C. Carditis
D. Pneumonia
62. **Which foods are recommended to avoid for children having Phenyl Ketonuria ?**
A. Ice cream
B. Juice
C. Cereals
D. Rice
63. **What rate the nurse uses while performing rescue breathing during CPR for a five-year old child ?**
A. 10 breaths per minute
B. 12 breaths per minute
C. 15 breaths per minute
D. 20 breaths per minute
64. **Which sport a child having childhood cystic fibrosis can undertake in the later life Except ?**
A. Scuba diving
B. Table tennis
C. Baseball
D. Chess
65. **While caring a neonate having imperforate anus, the nurse assess urine output for which of the following ?**
A. Meconium
B. Blood
C. Bile
D. Acetone
66. **While initiating Fluid replacement therapy for an infant having pyloric stenosis What should be added to the I/V fluid ?**
A. Calcium chloride
B. Sodium chloride
C. Potassium chloride
D. Magnesium chloride
67. **While teaching the parents of a child having temporary colostomy due to Hirschprung's disease what type of food should be recommended ?**
A. High fiber diet
B. Low fiber diet

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- C. High residue diet
D. Regular diet
- 68. Which of the following is most serious complication for children having lead poisoning ?**
- A. Cirrhosis of liver
B. Stunted growth
C. Neurologic deficit
D. Heart failure
- 69. The nurse caring for a toddler admitted with near drowning diagnosis should be connected for which of the following ?**
- A. Hypothermia
B. Hypoxia
C. Fluid aspiration
D. Cutaneous capillary paralysis
- 70. Which of the following disorders improve with increase in age ?**
- A. Conduct disorder
B. Emotional problems
C. Temper tantrums
D. Sleep disorder
- 71. What is the average birth weight of Indian Child ?**
- A. 3.5 Kg
B. 2.8 Kg
C. 2 kg
D. 4 kg
- 72. Neonatal period extends up to how many days ?**
- A. 21 days of life
B. 30 days of life
C. 28 days of life
D. 35 days of life
- 73. Anterior Fontanelle closes at what age ?**
- A. 1 year
B. 2 year
C. 3 years
D. 4 years
- 74. Which of the following conditions is not caused by cold stress?**
- A. Hypoglycemia
B. Increase ICCP
- C. Metabolic acidosis
D. Cerebral Palsy
- 75. During the Fetoplacental circulation, what is the shunt between two atria called ?**
- A. Ductus Venous
B. Foramen Magnum
C. Ductus Arteriosus
D. Foramen ovale
- 76. When a baby's mother RH-ve which of the following laboratory tests will probably be ordered for the newborn ?**
- A. Direct Coomb's
B. Indirect Coomb's
C. Blood Culture
D. Platelet count
- 77. A bacterial infection of the blood is called :-**
- A. Peritonitis
B. Intussusception
C. Septicemia
D. Encephalitis
- 78. Which of the following respiratory condition is considered as a medical emergency ?**
- A. Croup
B. Epiglottitis
C. Asthma
D. Cystic Fibrosis
- 79. Head control is possible in an infant by which age ?**
- A. 1 month
B. 2 months
C. 3 months
D. 6 months
- 80. Vocabulary of five year old child is how many words ?**
- A. 1-10 words
B. 10-20 words
C. 20-30 words
D. 30-40 words
- 81. What is the appropriate time for breast self-examination ?**
- A. Before menstruation
B. After menstruation

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- C. Any convenient time
D. During the ovulation period
- 82. Which of the followings is not true for an ideal Intra Uterine Device candidate ?**
- A. Nulliparous women
B. Has no history of pelvic disease
C. Willing to check IUD tail
D. Has regular menstruation cycle
- 83. Which of the following diseases may result in serious teratogenic defects in offspring if occurs during pregnancy ?**
- A. sRubella
B. rubeola
C. Variola
D. Variella
- 84. Which of the following is true indication of onset of labor ?**
- A. Gush of vaginal fluid
B. Passage of bloody shaw
C. Cervical dilation and effacement
D. Occurrence of strong uterine contraction
- 85. Which is the longest diameter of fetal skull ?**
- A. Oecipito frontal
B. Suboccipito frontal
C. Submento-vertical
D. Mento-vertical
- 86. During conception the fertilized ovum reaches the uterine cavity in :-**
- A. 2-3 days
B. 8-10 days
C. 6-7 days
D. 11-16 days
- 87. Which of the following urinary symptoms does the pregnant woman most frequently experience during the first trimester of pregnancy?**
- A. Dysuria
B. Frequency
C. Incontinence
D. Burning
- 88. Heartburn and flatulence, common in the second trimester, are most likely the result of :-**
- A. Increased plasma HCG levels
B. Decreased intestinal motility
C. Decreased gastric acidity
D. Elevated estrogens levels
- 89. For which of the following clients the intrauterine device would not be recommended?**
- A. Woman over age 35
B. Nulliparous woman
C. Promiscuous adult
D. Postpartum client
- 90. When developing a plan of care for a client newly diagnosed with gestational diabetes, which of the following instructions would be priority ?**
- A. Dietary
B. Medications
C. Exercise
D. Glucose monitoring
- 91. Which of the following would be the priority nursing diagnosis for a client with an ectopic pregnancy?**
- A. Risk for infection
B. Pain
C. Knowledge deficit
D. Anticipatory grieving
- 92. The fetal head is in which of the following position with a face presentation ?**
- A. Completely flexed
B. Completely extended
C. Partially extended
D. Partially flexed
- 93. What event occurring in the second trimester helps the expectant mother to accept the pregnancy?**
- A. Lightening
B. Ballottement
C. Pseudocyesis
D. Quickening

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

94. In which of the following types of spontaneous abortions would the nurse assess dark brown vaginal discharge and a negative pregnancy test ?
- Threatened
 - Imminent
 - Missed
 - Incomplete
95. The normal umbilical cord is composed of :-
- 2 arteries 1 vein
 - 2 veins 1 artery
 - 2 arteries 2 veins
 - None of the above
96. What is the maximum APGAR score ?
- 5
 - 20
 - 15
 - 10
97. Commonest presenting part is :-
- Vertex
 - Face
 - Brow
 - Shoulder
98. Which of the following is not a risk factor for pre-eclampsia ?
- Multiparity
 - Diabetes
 - Chronic hypertension
 - Obesity
99. The Shortening, or thinning of the cervix before or during early labor is known as :-
- Ripening
 - Effacement
 - Labor
 - Carnation
100. How much average weight gain occurs during pregnancy of an average weight woman ?
- 5-9 Kgs
 - 7-12 Kgs
 - 11-16 Kgs
 - 14-24 Kgs
101. As per National Nutritional Anemia Prophylaxis Program (NNAPP) a pregnant woman should get the following number of tablets containing 60 mg ferrous sulphate and 500 mg, folic acid :-
- 30 tablets
 - 60 tablets
 - 90 tablets
 - 100 tablets
102. Numerator for infant mortality rate is calculated by newborn death within :-
- 24 hours of birth
 - One week of birth
 - 28 days of birth
 - One year of birth
103. The disease caused by which of the following helminthes has been eradicated ?
- Tape worm
 - Guinea worm
 - Hook worm
 - Round worm
104. Mantoux test is done in tuberculosis by injecting 1 TU of PPD on the flexure surface of forearm and reading is taken after :-
- 12 hours
 - 24 hours
 - 48 hours
 - 72 hours
105. Following are the major risk factors for non-communicable disease except :-
- Stress
 - Immunodeficiency
 - Sedentary life-style
 - Smoking
106. Which of the following is also called Break Bone Fever :-
- Malaria
 - Chicken gunya
 - Dengue
 - Filaria

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

107. How much population an Accredited Social Health Activist (ASHA) looks after ?
- 1000
 - 2000
 - 3000
 - 5000
108. Specimen required for the diagnosis of corona virus is :-
- Urine
 - Blood
 - Nasal swab
 - Skin swab
109. Which Anti-Retroviral drug is given to child born to HIV positive mother with 72 hours of birth :-
- Efavirenz
 - Nevirapine
 - Zidovudine
 - Lamivudine
110. Following are the measures taken for prevention of genetic disorders except :-
- Avoiding unnecessary exposure to radiations especially gonads
 - Avoiding Consanguineous marriages
 - Avoiding inter caste marriages
 - Avoiding late marriages
111. Population covered by a Primary health center in plain area is :-
- 10000
 - 20000
 - 30000
 - 40000
112. Which of the following is secondary prevention ?
- Health promotion
 - Early diagnosis and treatment
 - Disability limitation
 - Rehabilitation
113. Right age of introduction of complimentary feeding to an infant is :-
- 3 months
 - 4 months
 - 6 months
 - 9 months
114. When is International yoga day celebrated in india?
- 20th June
 - 21st june
 - 21st july
 - 23rd July
115. Following dog bite, the dog has to be observed for :-
- 2 days
 - 5 days
 - 10 days
 - 20 days
116. The loudness of noise is measured in :-
- Decibels
 - Pascal
 - Lux
 - Becquerel
117. Mrs. Usha visits the Sub center for the health check-up. She informs she is missing her period. This is her visit. What should be the action of ANM at sub center:-
- Ask her to get her pregnancy tested if positive come to ante-natal clinic for registering the pregnancy
 - Get her pregnancy test done, if pregnant register her pregnancy and ask her to come for tetnus toxoid injection after completing three months of pregnancy
 - Get her pregnancy test done, if pregnant, ask her to come ante-natal clinic to get her pregnancy registerd
 - Get her pregnancy test done, if pregnant register her pregnancy and give her first dose of tetanus toxoid
118. Under Ayushman Bharat Rashtriya Swasthya Bima Yojna (RSBY), how much coverage is provided per family year for secondary and tertiary care hospitalization ?

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- A. Rs. 2 lacs
B. Rs. 5 lacs
C. Rs. 7 lacs
D. Rs.10 lacs
- 119. Which of the following vitamins are water soluble ?**
A. Vitamin A
B. Vitamin C
C. Vitamin D
D. Vitamin K
- 120. A person who harbors the microorganism but does not manifest the signs and symptoms of the disease is called :-**
A. Contact
B. Infected
C. Suspect
D. Carrier
- 121. Which statement describes anatomical position correctly?**
A. Standing erect. Looking straight, arms at side, palms facing, your side
B. Standing erect, face and head facing lateral, palms facing forward
C. Standing erect, looking straight arms at side and palms facing forward
D. Standing erect, looking straight, face facing upwards and palms facing backwards
- 122. True about coronal suture is :-**
A. Lies between frontal and parietal bones
B. Lies between two parietal bones
C. Lies between parietal and occipital bones
D. Lies between temporal and frontal bones
- 123. Hyaline cartilage is present in all EXCEPT :-**
A. Ends of long bones
B. Epiglottis
C. Coastal Cartilage
D. Trachea
- 124. Movements taking place at elbow joint are :-**
A. Flexion
B. Extension
C. Both
D. None of the above
- 125. Lining epithelium of alveoli is :-**
A. Cuboidal
B. Transitional
C. Simple squamous
D. Straified squamous
- 126. Which of the following hormone having highest blood level in luteal phase is :-**
A. estrogen
B. Progesterone
C. Prolactin
D. Oxytocin
- 127. In a nerve initiation of action potential occurs at :-**
A. Dendrites
B. Soma
C. Axon hillock
D. Axon terminal
- 128. Mycneric plexus is present in :-**
A. Mucosa
B. Submucosa
C. Muscularis externa
D. Serosa
- 129. Which of the following neural center is present in pons :-**
A. Pneumotaxic center
B. Ventral respiratory groups
C. Dorsal respiratory groups
D. None of above
- 130. The human body's ability to maintain a relatively constant internal environment is called as :-**
A. Heat loss
B. Homeostasis
C. Positive feedback
D. Negative feedback
- 131. Proteins are polymers of :-**
A. Sugars
B. Amino acids

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- C. Fatty acids
D. Nucleotides
132. **Milk is very poor source of :-**
A. Calcium
B. Zinc
C. Iron
D. Phosphorus
133. **Deficiency of Protein in diet leads to :-**
A. Kwashiorkor
B. Marasmus
C. Goiter
D. Anemia
134. **A patient comes to primary health care center with signs of clotting problem, a community health nurse suspects deficiency of :-**
A. Vitamin C
B. Vitamin k
C. Vitamin E
D. Iron
135. **One of the following is not the target eye disease under "Vision-2020-The Right to Sight's Program:-**
A. Conjunctivitis
B. Cataract
C. Glaucoma
D. Diabetic retinopathy
136. **Pharmaceutics is related to :-**
A. Drug manufacturing
B. Drug designing
C. Drug marketing
D. Drug promotion
137. **An antagonist has :-**
A. Affinity and intrinsic activity
B. Affinity but no intrinsic activity
C. Intrinsic activity but no affinity
D. Activity opposite to agonist
138. **Beta-I adrenergic receptors are :-**
A. Ligand gated ion channels
B. Enzyme linked receptors
C. G-protein coupled receptors
D. Gene based receptors
139. **Non-Steroidal Anti-inflammatory Drugs (NSAIDs) act through :-**
A. Inhibition of cyclooxygenase
B. Stimulation of cyclooxygenase
C. Inhibition of G-protein coupled receptors
D. Increasing prostaglandin synthesis
140. **Which of the following drugs is a broad spectrum anthelmintic?**
A. Metronidazole
B. Ivermeetin
C. Albendazole
D. Suramin
141. **Who is the father of Modern Microbiology ?**
A. Robert Koch
B. Edward Jenner
C. Louis Pasteur
D. Lister
142. **Structure of Bacilli is like :-**
A. Rods
B. Grapes
C. Oval
D. Triangular
143. **Coma-shaped bacteria are known as :-**
A. Staphylococci
B. Streptococci
C. Vibrio
D. Bacillus
144. **Which id the most common nosocomial infection ?**
A. Surgical site infection
B. Urinary tract infection
C. Respiratory infection
D. Gastroenteritis
145. **Sputum specimen should be taken preferably in :-**
A. Afternoon
B. Early morning
C. Evening
D. Late afternoon
146. **Who popularized grand public celebrations of Ganesh festival ?**
A. Chhatrapati Shivaji Maharaj

Monika's Nursing Academy Hamirpur

"Innovation is our Tradition"

- B. Bal Gangadhar Tilak
C. Emperor Akbar
D. Chandragupt Maurya
- 147. Who invented Stethoscope ?**
A. Robert Koch
B. Rene Laennec
C. William T.G. Morton
D. Galileo Galilei
- 148. Who is known as father of surgery?**
A. Hippocrates
B. Herodotus
C. Charak
D. Sushrut
- 149. Which is the oldest among Vedas ?**
A. Samved
B. Atharved
C. Rigved
D. Yajurved
- 150. Which of the following movies is based on life of Captain Vikram Batra ?**
A. Border
B. Paltan
C. Shershah
D. Captain Batra
